

CLIENT: SHELL PETROLEUM DEVELOPMENT COMPANY

PROJECT OVERVIEW:

As part of the on-going Bonny Terminal Integrated Projects (BTIP), there was a need to interface the PAS of existing Bonny NAG (BNAG) plant with new BTIP PAS in line with single operator window philosophy and harmonize the differences between BNAG and BTIP graphics. **Both systems are YOKOGAWA CENTUM CS 3000.**

The project work scope included but was not limited to the following:

- Modification of existing BNAG HMI graphics on installed Yokogawa Centum CS3000 DCS to comply with BTIP graphics specification.
- Site download and on-line testing of the updated BNAG graphics files.
- Update of all relevant documents.

STATUS

Completed 2008.
