

CLIENT: SHELL NIGERIA GAS LIMITED

PROJECT OVERVIEW:

This intent of this project was to provide a Graphical User Interface (GUI) between the operators and process equipment for effective remote process monitoring.

The project work scope included but was not limited to the following:

- HMI (Human Machine Interface) design in conformance with DEP 32.00.00.11 Standard.
- Programming of Allen Bradley Micrologix PLC for data acquisition and process monitoring.
- De-commissioning of existing LTU (Local Terminal Unit).
- Training of SNG operators on the functions and operations of the installations.

STATUS:

Completed.
